## IRISH TULIPS.

Last year we offered for the first time in the United States, six varieties of Irish Grown Tulips and promised those who purchased them a grace, fragrance, combinations of col. oring and size hitherto unknozun. Although the weather last Spring was somewhat unfav. orable for best results, these Irish Grown Tulips fuily carne up to the expectations of those who planted them, and as they are somewhat later in blooming than Dutch Grown sorts, the weather was more settled and allowed them to attain to great perfection. These Tulips are not only perfectly distinct from the Holland Grown varieties, but are in many respects superior. They do not come into flower antil nearly the end of May, after the glory of the Hyacinth, Daffodil and Early Tulips has departed. They are of taller growth, larger size and more brilliant colors; besides, all are sweetly scented. The year's experience gives us great confidence in recommending the sorts we catalogued last year. We have added to the list four new Gesneriana, that will prove acquisitions.

Billietiana. (16inches.) Bright yellow and crimson
Columbus. (rinches.) Velvety crimson, striped with gold
Didieri Alba. ( 14 inches.) Glist. ening, silvery white. Sweet pea fragrance
Golden Eagle. (12inches.) Pril. liant yellow. Very swe氏t scented
Macrospeila ( 12 inches.) Glist. ening sca let, with deep zone of black and yellow. Siveet pea fragrance.
Shandon Bells. ( $1+$ inches.) Pink and creamy yellow in bud, deep magenta when open
.90

## FOUR GESNERIANA TULIPS.

Rosea Cœrulea. ( 18 inches.) Bright rose with blue base
Rosea Alba Cœrulea. (18 inches.) Very bright rose, blue and white base in the form of a Maltese Cross

## FOUR EXTRA FINE SINGLE LATE TULIPS.

These four varieties come into bloom practically at the same time and are about one height, 18 inches. "When planted together they make a bed that attains nearer to the "Ideal" than anything else. We hope all lovers of the beautiful will plant a mass of these to crown the Spring garden of 1902.

| Golden Beauty. Golden yello | . 23 | \$1.25 |

## BOSTON PUBLIC GARDENS,

We continue to supply our customers the same quality and varieties of Tulips as used by Mr. Doogue in the Boston Public Gardens. And for the benefit of those who may wish to secure a similar effect another season, we give, in part, Mr. Doogue's arrangements of kinds:-
No. 1. Joost van Vondel, white, centre mass. Joost van Vondel, cherry red, flaked with white, for edging.

No. 2. Rose Luisante, deep rose, centre mass. Stanley, rich claret, for edging.
Ni. 3. Couleur de Cardinal, rich bronze red, centre mass. Cottage Maid, pink and white, for edging.
No. 4. Proserpine, rich dark rose, centre mass. Royal Standard Gold Striped, scarlet, striped with yellow, for edging. Other $\mathrm{sp} \mathrm{\imath}^{\circ}$. lly beautiful sorts are:-Vermillion Brilliant, Prince of Austria, Thomas Moore, White Swan, Kaizersl.. $w^{-1}$ and Standard Royal, all elsewhere described in this catalogue.

## JAPANESE FERN BALLS.

This beautiful Japanese novelty has already be come very popular. The centre is moss, covered in an ingenious manner with fern roots. To start into growth, place the ball in a pail of water until thoroughly wet through, hang in a window and water two or three times a week. After watering, growth begins in a few days, and the ball soon becomes a mass of beautiful, green, lace-like foliage. Each, 75 cents, net.

## EXAMPLES.

Faulkner Farm, Brookline, Mass., JUNE 5, igol.
JOSEPH BRECK \& SJNS,
Gents : - The bulbs for forcing, of which I buy several thousand every fall, were especially satisfac. tory this year, being large and well ripened. They all fo-ced splendidly and gave good results, particularly the Hyacinths which were the best I have had for several years.

Very truly yours,
David Weir, Supt.

Goddard Ave. Brookline, Mass. Joseph Breck \& Sons,

Dear Sirs:-I am pleased to state that the goods purchased of you at different times proved very satisfactory to me. I can recommend your goods and methods to friends without scruple.

Yours respectfully,
Kenneth Finlayson.

## DECORATIVE PLANTS FOR THE HOUSE. BEGONIA GLOIRE DE LORRAINE.

No flowering plant equals this for beanty and continuous bloom. Without special care it will flower throughout the entire winter and in such a profuse manner as almost to co nceal the foliage with its wealth of salmon-rose colored ilossoms.

We have had a large and very fine stock of this universal favorite grown e: pecially for our trade. The plants are all thoroughly healthy and clean; all are of blooming size and will give good satisfaetion. In $2 \frac{1}{2}$ inch pots, 25 cts . each; $\$ 2.50$ doz. In 4 inch pats, 35 cts . each; $\$ 3.50$ doz. In 6 inch pans, $\$$ i.00 each, $\$ 10.00$ doz.

## BEGONIA CALEDONIA.

We also offer nice plants of this new sort, propagated from stock rectived direct from the originator in Scotland. Cale fonia is the same in hıbit, height, foliage and florifcrousness as the Lorraine. The flowers however, are pure white. In $3 \frac{1}{2}$ inch pots, 75 cts . each. In 6 inch pans, $\$ 2.00$ eacli.
ARECA LUTESCENS. (Ostrich Feather Palm.) A majestic palm. Its dark, glossygreen leaves are gracefully curved on slender stems. The trunk and stems are golden yellow, irregularly spotted with bronzy green. In $3^{\frac{1}{2}}$ inch pots, 7 cts.; 5 inch pots, $\$ \mathrm{I} .00 ; 6$ inch pots, ${ }^{2} \$ 2.00 ; 7$ inch pots, $\$ 3.00$ each.

Gloire de Lorraine.

Kentia Belmoreana.
$\$ 1.00 ; 7$ inch pots, $\$ 1.50 ;$ S inch pots,

KENTIA BELMOREANA. (Curly Palm.) Recognized as one of the best for all purposes, being able to withstand more illusage, perhaps, than any other. The foliage is dark glossy green, the segments wide and gracefully recurved. In 41 nch pot, 75 cts .; 5 inch pot, $\$ 1.00 ; 6$ inch pot, $\$ 1.75 ; 7$ inch pot, $\$ 3.50$ each.
$\operatorname{cocos}$ WEDDELLIANA. The most slender and graceful of the upright feather-leaved palms. The leaves are very finely formed, and of great beauty. In $2 \frac{1}{2}$ inch pots, 30 cts .; 3 inch pots, $50 \mathrm{cts} . ; 3 \frac{1}{2}$ inch pots, 70 cts . each.
LATANIA BORBONICA. (Fan Palm.) This is a typical palm and is more largely used than any other. It is of strong, healthy habit, and especially suitable for window culture. In $3^{\frac{1}{2}}$ inch pots, $50 \mathrm{cts} . ; 4$ inch pots, 7 cocts . ; 5 inch pots, $\$ \mathrm{r} .00$; 6 inch pots, $\$ 1.5^{\circ}$; 7 inch pots, $\$ 2.50$ each.

PANDANUS UTILIS. (Screw Palm.). Very decorative and usefulfor the window garden. The large leares in leaving the stem, form a continuous spiral. It is a native of the Hatraiian Islands where the natives use its fibre for making cloth. In 4 inch pots, 50 cts . 6 inch pots, $\$ 1.00 ; 7$ inch pots, $\$ 2.00$ each.

DRACENA INDIVISA. Valuable as a window plant, also for centres for baskets, vases, etc. 5o cts. to $\$ \mathrm{r} .50$ each.
DRACEVA TERMINALIS. A beautiful decorative plant, gorgeous shades of crimson, bronzy green, and pink foliage. 50 cts. to $\$ 1.50$ each.

ARAUCARIA EXCELSA. (Norfolk Island Pine.) The rich feathery, deep green branches of this charming conifer are arranged in whoris at regular distances on the stem. It is one of the most popular and beautiful foliage plants grown. In 5 inch pots, 2 tiers, \$1.00; 6 inch pots, 4 tiers, $\$ 2.00$ cach.
ASPARAGUS SPRENGERI. The beautiful green feathery sprays, which drop gracefully, are often 3 to 4 feet in length. Excellent for hanging pots. 25 cts. to $\$ 1.00$ each.
RUBBER PLANTS. Ficus Elestica. We can furnish nice, healthy plants of this favorite at from $\$ 1.00$ to $\$ 5.00$ each, according to size. NEPHROLEPSIS EXALTATA BOSTONIENSIS. Boston Fern. A very popular window-plant. It bears well with heat, dust

We thank our many customers and friends for their orders and recommendations. We are glad to anounce that the quality of the bulbs we offer this year is very superior, owing to the prevalence of favorable weather during the growing and ripening periods in the several countries from which we import them.

The prices hare been carefully considered, and in many instances reduced. Hence with these encouraging conditions we expect an increased demand. Ourbulbs have been produced for us, under contract, by the same growers for a great many years and are the best obtanable.

The sorts grown in Europe hate been shfetel plersonalify by our Mr. Archibald Smith. Thosf from Permuda arey aiso they rlisulit of our representative's visit to the, Island, while odr Japanksh, shipaifots are in accordance with Mr. Bapr's recommendations. Therberore we hope to thoroughly satisfy ali, who fayor us with their commanis. IVe urgethe EARLY PIACING OF ORDERS.

Begin by planting a few Freesias, eight or ten bulbs in a six-inch pot or pan, in August, they will bloom before Christmas. Narcissus, Paper White Grandiflora and Hyacinths, White Roman can easily be flowered to decorate the Thanksgiving table, if planted in September. Lilium Harrisii potted in August should produce its large, beautiful pure white, trumpet-shaped flowers by Christmas. Dutch Hyacinths and Tulips ordinarily bloom in about four months from time of planting, aud there is a host of other equally desirable and easily grown bulbous plants worthy of attention.

Bulbs intended for flowering in the house should he potted as soon as received, and placed in a cool cellar or out-house; a succession of flowers will he obtained by bringing them, as wanted, into a room where the temperature averages $70^{\circ}$ during the day and about $50^{\circ}$ at night. For out doors, the sooner after the beginning of October that bulbs intended for spring flowering out doors are planted, the finer will be the flowers, because they make some root growth before severe weather begins, and thus obtain food from the soil instead of subsisting on themselves.

NOTICE. While we exercise the greatest care to have all Seeds, Plants, Bulbs, and Nursery Stock of the best kind, we do not give and our agents and employees are forbidden to give, any warranty, express or implied. If you do not accept the goods on these terms, you must return them at once, and all payments therefor will be refunded.

## JOSEPH BRECR \& SONS

(Corporation.)

See Special Offers on Third Page of Cover.

## MYACINTHS.

The Hyacinth is the most popular, beautiful and fragrant of Holland bulbs. It is of almost every imaginable shade of color, and is suitable alike for house or

Single Hyacinth.
garden culture.
Pot Culture. Plantings may be made at any time from September to December, though October is the best time. A light, rich soil with a mixture of well rotted cow manure, sand and leaf mould is most suitable, use a fire-inch pot and have the top of the bulb just abore the surface of the soil. After setting the bulb, thoroughly firm the soil and give a good watering. The pots should then be set away in a cool cellar or out-house and covered over with coal ashes or some litter, for a few weeks, until the roots begin to grow; they may then be brought as wanted for a succession of flowers into a moderately warm light room.

Culture in Glasses. When it is desired to grow Hyacinths in water, they should be placed so that the base of the bulb merely touches the water. The glasses should then be set in a cool, dark closet, or in the cellar, until nearly filled with roots, when they may be brought into the light. Change the water frequently. Give as much fresh air as possible without letting the plants stand in a draught. It is of importance in growing Hyacinths in the parlor, that the atmosphere in which the plants are growing be kept moist, and as nearly as possible at a temperature of from sixty-fire to seventy degrees.

Outdoor Culture. The bulbs may be planted any time after the beginning of October and before the winter frosts set in. Any good, well drained garden soil will answer. Dig deep, and mix in a little decomposed manure; set the bulbs from three to four inches below the surface, and about six inches apart; after the ground becomes frozen, gire a good covering of stable litter. In spring, about two weeks after the flowers have faded, the bulbs may be lifted, cleaned, packed in a box of dry sand and stored away in a cool place until wanted again for planting in the fall.

## NAMED HYACHNTMS. BRECK'S HAND PICKED BULBS.

Are all of flowering age, thoroughly matured and the finest varieties in cultiration.
WE INVITE COMPARISON.
Note.-As the single Hyacinths give the most satisfactory results, we always send a larger proportion of single than double, unless specially ordered to the contrary.

## Early Roman Hyacinths.

This variety of the Hyacinth, a great favorite with all florists, may be had in flower by Christmas, when their fragrant flowers are most valuable for bouquets. They show to better advantage if four to six bulbs are planted in a pot.

## Miniature Hyacinths for Jardinets, Fancy Pots, Etc.

These are similar to the ordinary Hyacinths, but diminutive, and are usually grown in sand or moss, like Crocuses; they look very nice when grown three or fcur together in pots.

## TULIPS.

The perfect hardiness, ease of culture, varied markings, brilliant colors and in some cases sweet perfume make the Tulip as popular today as it was two hundred years ago when the mania for it, at any price, raged so furiously in Holland. They are effective and desirable even as single specimens, but it is when grown in masses that the best effect is produced. Any good garden soil will do for the Tulip. When the soil is naturally poor a mixture of equal parts well rotted manure, well rotted sods or good loam or leaf mould may be applied. See that the drainage is good before planting, which should be done in October or November. Set the bulbs three and a half inches deep and five inches apart. A half inch of sand beneath the bulb is of essential benefit in preventing injury from excessive wet.

VAN THOL TULIPS are the earliest and especially adapted for pot culture. The best effect is obtained by planting from six to twelve bulbs in a large pot.

The varieties marked ( $\dagger$ ) bloom simultaneously about twelve days later than the VAN THOLS. This key will be useful in selecting for masses. Although nearly all the single early sorts will force to a certain extent, those marked (*) are the most suitable. The kinds that have an. (Ex:) affixed are the finest for exhibition. The figures affixed indicate about the height in inches to which each variety grows.

## TULIPS.-Continued.

## Parrot Tulips.

This species has fringed flowers, brilliant crimson and yellow, with shades of bright green; very gay and effective in mixed borders, and forming a fine succession to the early flowering varieties.

The earlier varieties of this beautiful class of Tulips are admirably adapted for forcing. The latter kinds are very effective for bedding, producing a dense mass of brilliant colors which remain in perfection a long time.

Note.-The words "early, medium and late," indicates the t:me of flowering of the different sorts.

## NARCISSUS OR DAFFODILS.

We have the most complete collection of Narcissus in America, and are in a position to cater to the wants of the public better than any house in the country.

Outdoor Culture. The Daffodil will grow in any ordinary garden soil and in almost any situation, but prefers moderately stiff, well-drained soil, in situations slightly shaded, such as the herbaceous border and the margins of flower-beds, along the outside edges of shrubberies, on woodland walks and on the margins of lakes and streams, or for naturalizing in the grass or woodland. Planting may be done in the fall any time before the frost sets in, October being the usual month for doing this. Once planted they should not be disturbed further than dividing and resetting in August once in three or four years, when they get too crowded. The varieties marked "H" are hardy ; those marked "HH" are hardy with a good covering of leaves or litter during winter; the kinds marked " $T$ " are tender, and most suitable for growing indoors.

Pot Culture. It is unnecessary to say anything as to the merits of Narcissus of all kinds for this purpose, as their popularity is universal. At the head of the list

## NARCISSUS. - Continued.

stands the Tazetta, or Polyanthus Narcissus, with its large bunches of fragrant flowers. The Paper White Grandiflora and Double Roman Tazettas are very largely used for forcing. All the varieties of the group are suitable for this purpose, and most excellent for cut flowers. The Bulbocodium or Hoop Petticoat Daffodil, planted say 3 to 12 in a pot, is most unique and attractive, and the same may be said of the Cernuus or Nodding Daffodil. The Campernelle or Large Jonquil (N. Odorus), and the Single and Double SüectScented Jonquils are splendid-the last-mentioned being exquisitely perfumed. Triandrus, the little Cyclamen Flow'ered Narcissus, is a perfect gem, one of the choicest things we offer. The Moschatus and other Spanish Daffodils are also worthy of special mention. For culture, the hints given under hyacinths may be followed. One rery important point is to keep them cool for the first four
 or five weeks when they are commencing to grow. After the roots are grown and the tops well started, they may be pushed forward more quickly in heat. In cutting for sending to friends or for market, the flowers should be cut in the bud, and when placed in water they will open out beautifully.

Ard Righ, or Irish King. A mag. nificent Daffodil; pure yellow, with the perianth el'gantly twisted, and the trumpet widely reflexed and fringed. $H$
Bicolor. Golden yellow trumpct with white perianth; ten days later than Horsfieldi. H'
Bicolor Emperor. Very large; trumpet golden yellow, perianth delicate primrose. H
Bicolor Empress. Immense golden yellow trumpet, with a broad white perianth of great substance. H
Bicolor Grandis. Color same as Horsfieldi, but a larger and later flower. H
Bicolor Horsfieldi (King of Daffodils). Large and stately; trumpet golden yellow, perianth white. H
Biflorus (Primrose Peerless). Pure white perianth, with soft yellow crown; two flowers on each scape; late flowering. H .
Bulbocodium (Hoop Petticoat). Rich yellow, small flower. HH
Bulbocodium Citrinus. Pure sul-phur-yellow; large, distinct, and be utiful. HH
Bulbocodium Monophyllus (White Hoop Petticoat). Pure white; in bloom at Christmas. HH
Cernuus (Nodding White Daffodil). Trumpet and perianth clear silvery white. HH
Countess of Annesley. One of the best; trumpet rich yellow, perianth sulphur; large and early. H
GoIden Spur. Rich, deep yellow; early and very large. H

$.03 .30 \$ 2.00$
Triandrus Albus (Cyclamen. Flozvered Narcissus). A showy and interesting species, producing three to six flowers on a stem; the cup is pale sulphur when first open. ing, ultimately changing to white; the divisions are long and reflexed like a Cyclamen, creamy white and very graceful. T
$.03 \quad .30 \quad 2.00$
Trumpet Clajor. Deep golden. yellow color; one of the best for garden culture and forcing. H
Trumpet Maximus (The Great Trumpet Daffodil). Very large and fine; trumpet and perianth deep golden yellow; trumpet well opened, recurved and fringed; perianth slightly twisted. H
Trumpet Minor. Elegantly tivisted petals, trumpet a little deeper yellow; a very distinct variety. H .
Mixed Narcissus from many choice sorts. H

## DOUBLE DAFFODILS.

The hardy varieties are unsurpassed for massing in quantity, and all the sorts may be grown in pots.
Aurantius Plenus (Eggs and Bacon), Doz. 100 (Orange Pheenix). Soft sulphur with crim. son center, very double; showy and distinct. H.
Cernuus Plenus (The $\dot{S}$ wan's Neck Daffodil). An extremely beautiful variety, bearing full double flowers of a delicate creamy white, sometimes tinged with lemon in the center. HH.
Incomparabilis Plenus (Butter and Eggs). Yellow, very double. H.
Jonquilla Plenus (The True Double SwectScented Jonquil). Heads of small very double flowers, of a deep, golden yellow, and powerfully fragrant. HH.
Poeticus Plenus (Double White Pot's Nar. cissus). Pure white,like a Gardenia, very double and fragrant. H.
Rip Van Winkle (The Irish form of $\dot{N}$. Minor Fl. Pl.) Pale, rich yellow, shaded, full double, curiously pointed and fringed. The flower is small and perfect, just the size for a buttonhole bouquet. Must be grown in light, gritty soil. HH. Each, .io
Sulphureus Nanus (Codlins and Cream), (Sulphur Phonix). The largest of all the double daflodils; flowers, creamy white, changing to pure white, and of great substance. H.

Each, 15
Telamonius Plenus (Double Daffodil), (Von Zion). Large, double, deep golden yellow ffowers. H.

## Polyanthus Narcissus (N. Tazetta).

The varieties of this group produce an abundance of large trusses of very sweetscented flowers, varying in coler from pure white to deep golden yellow; easily cultivated and excellent for pots and forcing. The Paper White Grndiflora and Double White Roman can be forced into bloom by Christmas.
 orange nectary. $\mathbf{T}$.
Paper White Grandiflora. An im. proved form of Paper White, being larger and earlier than the old sort.

Gloriosa. White, yellow nectary. T. . 25 1.50 White, citron nectary.

See Special Offers on Third Page of Cover.

Chinese New Year's Lily.

## CHINESE NEW YEAR'S LILY. (NARCISSUS ORIENTALIS).

No care whatever is required in the cultivation of this beautiful and interesting bulbous plant. Use shallow dishes about three inches deep, into which put about one inch of gravel. Set the bulbs on this and fill in with small stones or pieces of marble to keep them upright, and keep the dish full of water. These bulbs do not require to be put in the dark, but a little shading until the leaves begin to grow is beneficial. A pinch of wood ashes now and again, and when changing the water putting a few drops of ammonia into it will largely ensure success. Io cts. each ; \$1.00 per doz.

## LILIES.

Everything considered, there is no class of hardy flowering plants so desirable as the Lily family. Their cultivation is not difficult, nearly all of the varieties being hardy and flourishing in ordinary garden soil. We recommend deep planting, from six to twelve inches, according to the size of the bulb and depth of soil. When it is practicable to obtain peat, or leaf mould and sand in which to grow them, better results will follow.

Following are the usual dates at which we make delivery of the different varieties of Lilies.

Harrisii, July 15; Longiflorum (Bermuda grown), Candidum, Aug. ıо; Tenuifolium, Wallacei, Pardalinum, Dalmaticum, Chalcedonicum, Canadense, Sept. 1o; Auratums, Speciosums, Testaceum, Davuricums, Elegans, Atrosanguineum, Philadelphicum, Browni, Croceum, Martagon, Oct. I; Concolor, Krameri, Parryi, Batemania, Hansoni, Humbolti, Leichtlinii, Monadelphum, Nov. I.

Pot Culture. The best compost to use is loam and peat in about equal parts, with the addition of a sprinkling of sharp sand and powdered charcoal. Select a large-sized pot, say an 8 or io inch, so as to allow of deep planting, a most essential matter where their are upper roots to be protected. Dust a little charcoal about the bulb to keep it fresh, and cover at least two inches with soil. Water lightly until the shoot begins to appear; never apply liquid manure of any kind unless as a stimulant, when just about to flower. Among the varieties worthy of special mention for growing in pots, we would notice particularly, Auratum, Speciosum, Longiflorum, Harrisii, Tenuifolium and Candidum. Other excellent sorts for pots are Browni, Krameri, Chalcedonicum, Batemania, Wallacei, Monadelphum, etc.

## LILIUM HARRISII. (Easter Lily).

Pot bulbs as soon as received, using pots about twice the diameter of the bulb. If planted in August and pots set out doors with a covering of 4 to 6 inches of litter, they will be rooted and ready to bring into the house by October, where, if they are kept in a temperature of from $55^{\circ}$ at night to $70^{\circ}$ during the day, they will be in flower by Xmas. A succession of bloom is obtained by bringing into the house a supply as wanted, but bear in mind that Harrisii is not hardy, and requires protection if kept out doors after cold weather sets in.

## LILIUM LONGIFLORUM.

Produces fewer flowers but of better substance than Lilium Harrisii. It is grown in large quantities for Easter decoration, and requires the same treatment as that sort.

Lilium Harrisii.

## LILLIES.-Continued.

Auratum. (Golden Rayed Lily of Japan.) Ivory white Each Doz. ground, thickly strewn with purple studs; the centre of each petal has a band of light golden yellow, extending from tip to base. The most magnificent of lilies.
Auratum Rubrum - Vittatum. In this form of Auratum, the band is crimson instead of yellow, and the blotches are large and chocolate brown in color.
Batemanniæ. Cltar orange apricot, without spots, six to eight flowers borne on a stem four feet high.
Browni. Trumpet shaped flowers ten inches in length, interior pure white with chocolate colored anthers, exterior brownish purple; height, three feet.
$.15 \$ 1.50$

Canadense. (Canadian Bell-Flowered Lily.) Color varies from reddish orange to yellow, thickly marked with black spots; height, three to four feet.
Candidum. (The Madonna Lily.) (White Garden Lily.) Pure white, good for both pot and garden cultivation; height, four feet.
Chalcedonicum. Beautiful, deep scarlet; height, three feet.
Concolor. Fiery, scarlet flowers, faintly spotted with black; height, two feet.
Croceum. Large umbels of orange colored flowers, thickly spotted with black; height, three feet.
Davuricum Erectum. Flowers scarlet, shaded with yellow, in umbels of tight to ten on each stem; height, three feet. (Synonyms, "Umbellatum" and "Fulgens.").
Davuricum Grandiflorum. Crimson, passing to orange, very large flowers; height, three feet.
Elegans Atrosanguineum. Rich, blood crimson, spotted with black; height, two feet.

Elegans Citrinum. Beautiful, light Each Doz. yellow flowers; height, one foot. . 15 1.50
Hansoni. Outside, yellow, streaked with white; inside, bright yellow, spotted with purple; height, three feet.
Humbolti. Rich, golden yellow, freely spotted with crimson-purple, the tips are beautifully re-curved; height, six feet.
Krameri. The flowers are six to eight inches in length, of a lovely rose color and very fragrant; height, three feet.
Leichtlinii. Pure canary yellow, with crimson spots; height, three feet.
Martagon. (Turk's Cap Lily.) Bears a pyramidal head of Howers, purple, spotted with black; height, four feet.

## CEDAR PLANT TUBS.

For growing Agaves, Century, and other large plants. Made of the best red cedar ; painted green; iron handles.

Natural wood finish. These are strong, light, and thoroughly serviceable.

## GRASSES.

There is no better season in which to renovate a lawn that is burned or wearing out than from the middle of August until the end of September. Rake out the dead roots, moss and useless surface covering. Sow Breck's Standard Lawn Grass at the rate of two bushels to the acre, rake lightly and roll well. The dew, and cool nights together with the warmth of the days soon starts growth and carries it to perfection before winter sets in.

## Breck's Standard Lawn Grass.

One quart will sow 300 square fect. Quart, $\$ 0.25$
One half peck will sow 1,200 square feet. $\frac{1}{2}$ Peck, 75
One peck will scw 2,400 square feet. Peck, 1.25
One bushel will sow 10,000 square feet. Bushel, 4.00

## Boston Park Lawn Grass.

The same mixture of grasses and clovers as supplied by us to the City of Boston Park Commissioners for sowing on the Franklin and other Parks administered by them.

$$
\begin{array}{lr}
\text { One pound will sow 6So square feet } & \text { Price }
\end{array} \$ 0.30
$$

Our Booklet " The Lawn, The Garden," tells you how to make and care for a lawn. Free upon application.

We can supply other mixtures of so-called Lawn Grass Seed at competitive prices, but we recommend our own as being superior in every respect to all others. When desired we make special mixtures of Grasses to suit different soils and conditions.

## Breck's "Shady Spot" Lawn Grass.

This is a mixture of grasses that are naturally adapted for growing under trees and in places where the sun does not find ready entrance. If sown on such locations, in place of the ordinary Lawn Seed, bare and unsightly spots will be prevented.

Quart \$0.25. Peck $\$ 1.25^{\circ}$. Bushel \$4.00.

## Breck's Bank and Terrace Grass Mixture.

A mixture of deep-rooting grasses specially prepared for embankments and situations where it is impractical to get a successful catch of the less spreading rooted sorts. It produces a rich velvety turf throughout the season. No coarse growing undesirable varieties are used in this mixture

Quart \$o.25. Peck $\$ 1.25$, Bushel $\$ 400$.

## Golf Links Grass Mixture.

Since the game of Golf became so popular in this country, we have had frequent demands for mixtures of grass seeds, suitable both for the Courses and Putting Gieens, and adapted to low, damp, as well as the thinner dry soils on the elevations. It will be readily understood that no one mixture would be suitable for the different conditions. We have, therefore, prepared three mix'ures;

We will be glad to make special mixtures for other conditions of soil, etc.
Our general Catalogue has a valuable treatise on grasses and grass mixtures. The leading kinds of grasses are described in detail and sixteen formulas for different conditions are given. We mail it free upon application.

Grass Seeds for Fall Sowing.

## NURSERY DEPARTMENT.

We continue to give special attention to this important branch of our business. Our arrangements enable us to offer advantageously leading kinds of FRUIT, SHADE and ORNAMENTAL TREES, EVERGREEN and FLOWERING SHRUBS, HERBACEOUS PLANTS, Etc., of first-class quality at reasonable prices. Parties laying out new places, or wishing to re-arrange or improve their grounds can avail theinselves of our experience and advice. We will be glad to send a competent person to examine the grounds and advise as to changes or laying out.

HERBACEOUS PLANTS, ORNAMENTAL SHADE AND FRUIT TREES, GRAPE VINES, CURRANTS and SMALL FRUIT of all kinds get a better start if planted out in the fall, and we recommend planting at this season.

## SHADE AND ORNAMENTAL TREES.

Ash, American White (Fraxinus Alba). $10 \mathrm{ft} ., 75$ cents ; $12 \mathrm{ft} ., \$ 1.00$.

Maple, Norway (A. Plantanoides). $8 \mathrm{ft} ., \$ 1.00 ; 10$ ft., $\$ 1.25$.
Maple, Sugar ( $A$ Saccharinum) . $10 \mathrm{ft} ., \$ 1.00 ; 12$ to $15 \mathrm{ft} ., \$ 1.50$.
Magnolia, Acuminata (Cucumber $M$ ). 5 ft., $\$ 1.00$.
Magnolia, Soulangeana. Nice specimens, $\$ 1.50$ to $\$ 3.00$.

## FRUIT TREES.

## APPLES.

Name of Month designates time of ripening.
Apple, Astrachan, Red. Early, handsome, red, pleasant, acid; white flesh. Eariy August
Baldwin. A well-known sour winter apple. December to April.
Early Harvest. Yellow, tender, sub-acid. Bears young. August.
Gravenstein. Very large, sub-acid. September to October.
Greening, R. I. A superior cooking and eating. Mild acid. Green. December to łebruary.
Hubbardston Nonesuch. Large, dark red striped. One of the best for eating and cooking. November to February.
Per tree one.half to one inch in diameter, five to six feet high, 35 cents, $\$ 4.60$ per dozen. Une and onehalf to two inches in diameter, seven to nine feet high, in bsaring, $\$ 1.00, \$ 10.00$ per dozen, except where noted.

## PEACHES.

Crawford's Early. Very large, oval, pointed, yellow, with red cheek, very juicy, sub-acid, excellent, vigorous and productive. Ripening early in September.
Crawford's Late. Very large, yellow, with broad red cheek, rich, juicy, vinous, and deservedly the most popular late kind. Ripening in October.
Mountain Rose. Large, roundish, free stone. Tree hardy, vigorous, productive. Ripening in August.
Per tree, 1 to 2 years, 4 to 6 ft ., 2 j cts.; extra large or older trees, 6 to 7 ft ., 50 cts .

Mulberry, Downing's Everbearing (Morus). ft., \$1.u0.
Oak, White (थuercus Alba). $\$ 1.00$ to $\$ 2.00$.
Poplar, Bolliana (Populus). Pyramidal growth. $8 \mathrm{ft} ., \$ 1.00 ; 10 \mathrm{ft} ., \$ 1.25$.
Poplar, Lombardy ( $\stackrel{P}{P}$. Fostigiata). $6 \mathrm{ft} ., 50$ cents; 8 to 10 ft ., 75 cents.
Willow, Great Weeping (Salix Babylonica). 6 it , 50 cents ; 8 ft , 75 cents.

## HEDGE PLANTS.

Honey Locust. 2 years old. . . $\$ 6.00$ per 100 Arbor Vitae American. 2 to 3 feet 10.10
Hemlock. 2 to 3 feet . . . . 30.00
Califormia Privet. 2 to 3 feet . . 10.00
Purple Barberry. i to $1 \frac{1}{2}$ feet . $12.00 \quad 6$

## ROSES.

We name here twelve of the best Hardy sorts; description of these and over one hundred others will be found in our general catalogue.

Alfred Colomb.
American Beauty.
Baron de Maynard.
Baroness Rothschild.
Duke of Edinburgh.
John Hopper.

Jules Margottin.
La France.
Mabel Morrison.
Madame Victor Verdier. Paul Neron.
Ulrich Brunner.

## PEARS.

## SUMMER SORTS.

Bartlett. Large and juicy. Late.
Clapp. Productive. Large and juicy.

## AUTUMN SORTS.

Beurre Hardy. October. Large green russet.
Beurre Bosc. October. Large and very finc.
Duchesse d'Angouleme. October. Very large. Seckel. September. Small, but fine quality.

WINTER SORTS.
Anjou. November to January. Large. High flavor. Dana's Hovey. Novenber. Small. Rusty yellow. Nellis. January. Medium size. Extraquality.
Vicar. December. Very large. Fine for cooking. $5 \mathrm{ft} ., 75$ cents each. Larger trees, $\$ 1.00$ to $\$ 3.00$.

## QUINCES.

Quince, Champion. Vigorous, upright grower, bearing young and abundantly; fruit larger than orange and best quality. Per tree, 75 cts. to $\$ 1.00$.

Meech's Prolific. A strong, vigorous grower, immensely productive, and of best quality. Per tree, 75 cts. to $\$ 1.00$.

Orange. One of the best. Per tree, 75 cts . to $\$ 1.00$.

## RASPBERRIES.

Cuthbert. One of the very best, being hardy in winter. Fruit clear red, firm, and carries we!! to market.
Goldea Queen. A sport from Cuthbert.
Gregg. The largest and best late black cap; requires generous treatment to give fine fruit.
Hansell. The earliest of all Raspberries; hardy, of vigorous growth and productive. Fruit bright crimson, very firm. The above varieties, per dozen, $\$ 1.00$, hundred, $\$ 5.00$.

## BLACKBERRIES.

Early Harvest. Extra early, and of fine flavor; hardy, vigorous and productive.
Lucretia Dewberry. (Nezv). A partially trailing blackberry, juicy and rich fruit. Per dozen, \$1.50; hundred, \$1o.oo.
Snyder. An entirely hardy and productive kind, of good quality.

## CURRANTS.

Cherry. Very large, with dark red berries, rather acid.
Fay's Prolific. $\bar{X}$ valuable variety, remarkably productive, with very long bunches of large, rich, red colored frnit. Two year plants, 25 cents; doz.
La Versaillaise. Splendid, large red. The above varieties, except where noted, per dozen, $\$ 1.00$; hundred, $\$ 5.00$; thousand, $\$ 30.00$.

## GOOSEBERRIES.

Smith's Improved. Large, light green, of fine quality. Per dozen, \$1.50.
The Triumph. A new American seedling. Per plant, 35 cents; dozen, \$3.00.
Whinham's Industry. Per plant, 20 cents; dozen, $\$ 2.00$.

## GRAPE VINES. For the Open Ground.

Grape Vines, Brighton. Excellent quality; bunch large, berries red.
Concord. Acknowledged to be "the grape for the million."
Delaware. A sinall, but very delicious, red grape; very hardv.
Eaton, New Black. Hardy, vigorous, productive, healthy. Clusters weigh from ten to twenty-five ounces. Per vine, two-year vines, $\$ 1.00$; one year, 50 cents.
Green Mountain. An extra early seedling from Vermont, remarkable for its health, vigor and productiveness; quality is unsurpassed.
Moore's Early. A large, early, and handsome grape. Has all the good points.
Niagara White. The vine is remarkably hardy; bunches very large. Ripens with the Concord. It is enormously productive.
The above Hardy Grapes are all strong, healthy, two-year vines. Per vine, 50 cents; one year, 35 cents; except where noted.

## POT GROWN STRAWBERRY PLANTS.

The earlier they are planted the larger the first season's crop will be. The plants may be set in brds of three rows, one foot apart, and one foot distant in the rows, with a space of about three feet between the out. side rows of adjoining beds left for a pathway, or they may be planted in rows three feet apart and one foot apart in the rows.

Where the winters are severe, with little snow for protection, a light covering of leaves, or salt hay, or the branches of evergreens will be of great service. This covering should not be placed over the plants until the ground is frozen, say from the middle of November till the beginning of December. The covering should be removed in spring just as soon as the plants begin to grow.

The sorts marked ( P ) are pistillate, and will not fruit alone, but should be planted beside some staminate or perfect flowered variety.
Talbot (P.) Roundish conical form, bright red color, large and of delicious flavor, $\$ 250$ per 100 .
Marshall. A worthy favorite, the fruit is very large, deep crimison color, and of extra quality and flavor. Late. $\$ 2.50$ per ico.
Clyde. Large, roundish conical form, bright scarlet, good quality. Season medium, $\$ 2.50$ per 100 .
Gladstone. Plants of vigorous giowth and productive, fruit as large as Sharpless, quality very good. Early, $\$ 2.50$ per 100 .
Belmont. A general favorite for market and home use. Large, dark crimson fruit. Late, $\$ 2.50$ per 100 .
Nick Ohmer. Large, conical, dark red fruit of excellent flavor. Very suitable for winter forcing under glass. Season medium, $\$ 2.50$ per 100 .
Rio. A large, crimson, productive sort, of good quality. Early, $\$ 2.50$ per 100 .
Haverland (P.) A fine berry, color light red. Large, and of good quality, very productive. Early, \$2.50 per 100.
St. Joseph Everbearing. Bears abundantly throughout the season. The berries are of medium size, bright red color, and sweet aromatic flavor. \$3.00 per 100.

## LAYER STRAWBERRY PLANTS.

Ready for shipment about the first of October. The plants we furnish are well rooted layers from the open ground. The price for the foregoing sorts and Bubach No. 5 (P), Brandywine, Enormous (P), Gandy, Glen Mary, and Leader is \$'.00 per 100.

## Hardy Herbaceous Perennials.

These plants grow in beauty, size and value year by year. They require less care than most desirable flowering plants, and are adapted for nearly every condition. The months named indicate the time of flowering of each.

Achillea " The Pearl." Pure white, double. 2 feet
Alyssum Saxitile Compactum. Beautiful yellow flowers in Spring. 6 inches
Anemone Japonica Rosea. Dark pink flowers in August and September. 2 feet
Alba. Beautiful white. 2 feet
Anthemis Tinctoria. (Yelloz Marguerite.) Flowers May and June. 2-3 feet
Aquilegia Chrysantha. Rich yellow. July. 3 feet Cœrulea Hybrida. Shades of blue, white, pink, yellow, etc. 2-3 feet
Armeria Laucheana. (Sea Pink). Bright rose. May to fro t. ginches
Aster Formossima. Rosy-purple. September. 4 feet.
Nova Angliae Rosea. Pink New England Aster. 3 feet.
Boltonia Latisquamæ. Clear lilac. September. 4 feet
Campanula Grand flora (Platycodon.) Very dark blue. August-Stptember. 2-3 feet

Spireea Palmata. Crimson flower. Palm-like foliage. Summer. 3 feet
Veronica Longifolia Subsessilis. Blue flowers. August-September. 3 feet.

The prices attached are very low for strong plants, but we will furnish one plant of each of the 56 kinds named for $\$ 8.00$ net.

## POULTRY SUPPLIES.

(Prices subject to change.)
All Poultry Supplies are specialties with us, and it is a fact, generally known, that we carry the most complete line of the Best Goods to be found anywhere in the United States. We, however, call especial attention to the following Three Feeds.

Breck's Poultry and Saine Meal. A meat, blood and bonc preparation made from a German formula and originally introduced by us to the Poultry Keepers of the U.S. in iSg2. It is the best animal matter food on the market today and is used and endorsed by thousands of Poultry men from Maine to California. If you have not yet tried it you should do so at once. 100 lb . bag, $\$=25 ; 50 \mathrm{lb}$. bag, $\$ \mathrm{I} . j \mathrm{o}$; trial bag (a month's supply for 30 hens), $\$$ ioo.
Breck's Cereal Chicken Feed. This is a combination of cracked and othervise specially cut and prepared grains iat the proportions that long experience in raising and feeding chicks for profit has shown to produce the best results. It is in itself a sufficient food to carry the chicks from the shell to maturity in the shortest possible time and with best results as to health, no matter whether the birds are wanted for broilers, roasters or early laying. It is used in large quantities by the most successful Poultry men in the country, and is without doubt the best cereal preparation on the market. 50 lb . bag, $\$ 1.25$; 100 lb . bag, $\$ 2.00$. Net.
Breck's Alfalfa and White Clover and Clover Meal. Cut Clover and Clover Meal are so well known and generally used that we need not say a word regarding their value as part of the daily rations. Much of the material, however, sold under these names c nntains but a small percentage of clover, or consists of the clover stalks from which a crop of seed has been harvested and consequently is simply woody fibre and of little value for poultry.
Knowing all this we have had grown especially for us scveral fields of Alfalfa, White and Red Clovers. These mixed in the right proportion form a clover ration in every way superior to others on the market. We exercise care to have the several crops cut at the proper stage of growth and under rather than overcured. We feel sure our many poultry keeper friends will appreciate the excellence of these clover mixtures and see when buying that spurious brands or inferior grades are not substituted for them. A reasonable trial only is necessary to demonstrate their superiority. When buying be sure to ask for and get only Breck's Alfalfa and White Clover and Breck's Alfalfa and White Clover Meal. Per 50 lb .bag, $\$ 1.25$; 100 lb bag, $\$ 2.00$. Net. Special price per ton upon application.
Ground Oyster Shells. 103 lb . bags, 65 cts. per 100 lbs .; in bbls. of $250 \mathrm{lbs} ., 65 \mathrm{cts}$. per 100 lb .
Mica Crystal Grit. $50 \mathrm{lb} . \mathrm{bag}, 65 \mathrm{cts} . ; 100 \mathrm{lb} .$, 90 cts.
Cracked Poultry Bone. Per bbl. of about 200 lbs., $\$ 2.5^{\circ}$ per 100 lbs .
Bone Meal for Poultry and Cattle. 50 lb . bag, \$r.50; 100 lb . bag, $\$ 2.50$; per bbl. of about 200 lbs. , $\$ 2.50$ per 100 lbs .
Flour of Bone. 50 lb . bags, $\$ 1.50$; 100 lb . bags, $\$ 2-50$; per bbl. of about 200 lbs ., $\$ 2.50$ per 100 lbs .
Ground Beef Scraps. 50 lb bags, $\$ 1.50$; 100 lb . bags, $\$ 2.50$.
Wheat. $\$ 1.50$ to $\$ 2.00$ per 100 lbs ., according to quality. Net.
Wheat Screenings. $\$ \mathrm{I} .25$ to $\$ \mathrm{I} .50$ per 100 lb . bag, according to quality. Net.

Green's Poultry Food. A mixture of granulated cereals, grand as a scratching iood for both chicks and adult fowls. Per 50 lb . bag, $\$ 1.25 ; 100 \mathrm{lbs}, \$ 2$.
Spratt's Food. The celebrated English preparation, nothing equals it for young chicks. 50 lh . bag, $\$ 3.00 ; 100 \mathrm{lbs}$., $\$ 5.50$.
Barley. So cts. per bu. Net.
Buckwheat. 90 cts. per bu. Net.
Peas. Small white Canada, $\$ \mathrm{i} .25$ perbu. Net.
Sunflower. I.arge Russian, $\$ 1$ 5o per bu.
Millet. Golden, for chickens, $\$ 1.25$ per bu. of 50 1 bs . Net.
Hemp, Large Russian. Much fed to pigeons and fowls that are being fattened for the table, $\$$ i. 75 per bu. of 40 lbs . Net.
Kaffir Corn, or White Sorghum. Per 100 lb . bag, \$1.50. Net.
Breck's Eureka Egg Food. This preparation stands without a rival, as hundreds of those who have used it testify. It aids digestion, prevents and cures many discases common to fowls, and : theough the best food known to produce (ggs, it does not destroy the fertility of the eqg. Sample box by mail on receipt of 25 cents. 1 lb. box, 25 cents each; if by mail, 40 cents each; $2 \frac{1}{2} 11$. box, 50 cents each; by mail, $\$ 1.00$ each; 6 lb . box, $\$ 1.00$ cach; 10 lb bnx, $\$ 1.50$ each; 25 lb . kegs, $\$ 3.50$ each. ## Prairie State Incubators and Brooders.

## JOSEPH BRECK \& SONS (Corporation),

 New England Agents.

The only machines made with which the amateur or professional can always be sure of success are the Genuine Prairie State Incubators and Brooders made at Homer City, Penn. Do not be deceived by the wordy advertisements of other makers, but investigate these machines thoroughly.

We guarantee their successful operation. For the coming season a large, beautiful catalogue containing many colored plates, up-to-date information, testimonials, etc., is now ready for distribution. If interested, send for this work. We will send it by mail, postpaid.

## IIIPORTANT.

Before purchasing elsewhere write to us for circulars and prices of anything you may be in want of relating to the poultry business. We know we can please you as to prices and quality of the goods offered.

In addition to the articles shown in this catalogue we carry in stock the following, viz. :

## Mann's Green Bone Cutters, Wilson Grinding Mills, Thayer Brooder=House Heaters, Shell and Corn Mills, Clover Cutters, Caponizing Tools, Poultry Netting,

and many other articles which our space does not permit us to menticn. Don't fail to write for information.

## FARMER'S MANDY WAGON.

All thrifty farmers have for some time felt the necessity for a low-down, wide-tire, sho:t-turning, broad-platform wagon for general use upon the farm. This demand, until the first "Mandy Wagon" was built, had never been met. This wagon has been on the market for eight years, and it has reached as high a state of perfection as ingenuity and the criticism of its many users can effect. The No. 9 Farmer's IIand Wagon is the latest, and we believe it to be the best gencral purpose two-horse farm truck made. It, in connection with our platform, combines all the advantages which are sought in a farm truck.
No. y Farmer's Handy Wagon, Our net price, $\$ 35.00$ Platiform Frame for No. $9 \quad 6 \frac{1}{2} \mathrm{xij}_{13} \mathrm{ft}$. " " 7.00 Complete descriptive catalogue mailed on application. Not included in our special offers.

For Lawns, Division Fences, Churches, Cemeteries, etc., stronger, neater in appearance and less expensive than unsightly wood fence.

## Standard Fence.

Pickets $2 \frac{5}{8}$ in. apart.

| ${ }^{2} 4 \mathrm{in}$. high, 4 |  |  |  |  |  | foot |  |  | Price |

## Close Mesin Fence.

Pickets $1 \frac{3}{1}$ i: 1 , apart.

The pickets are made of two No. 12 galvan'zed steel wires, formed as shown in cut, with two twists between opening in the picket.

The cables are made of two No. 14 galvanized steel wires, spaced $6 \frac{1}{2}$ inches apart. These are twisted between the legs of the pickets which hold the flat side of the picket $i n$ the plane of the fence and at the same time prevent the cables from slipping on the picket.

The fence is very strong, fits uneven ground and will follow an incline as well as a level surface.

## Standard Rolls, 300 feet. Special Lengths made to Order.

Also, Posts, Gates and Fittings for Union Lawn Fence, and several st les of Field, Farm and Park Fencing. Catalogues and estimates on application.

## POULTRYMEN, ATTENTION!

A year ago we announced a new and up-to-date edition of our "Points for Poultry Raisers," which was so favorably received that we were obliged to print several editions before April ist, igor. We will publish this fall, a revised "Points for Poultry Raisers" which will contain new and valuable matter of great interest to all owners of Poultry. This work will be mailed on application.
